Hello TCNJ Community,

I want to thank you for your understanding and cooperation while we work on our underground steam pipes.

The shutdown for today took place at 2 pm as expected, but due to the weather conditions and high temperatures, we will need to allow for a greater cooldown period which will extend our return to service for Tuesday, August 17, 2021, at 4 pm. We apologize for this inconvenience and I will keep you informed of any changes.

A reminder of what is impacted by this shutdown is below.

Please feel free to email or call with any questions.

Many thanks and to all that have returned to campus this week, welcome back!

Maritza

Dear Colleagues,

In an effort to address various underground infrastructure repairs, we will need to shut down the steam to campus, several times over the next two weeks. As a result of these shutdowns, there will be no heat available in any of the buildings during the shutdowns, resulting in higher humidity levels. We will make adjustments to the systems to mitigate the impact.

Steam will be shut off beginning at 3 pm on Tuesday, August 3, 2021, and is expected to be turned back on by Wednesday, August 4, 2021, at 5 pm.

Steam will be shut off beginning at 2 pm on Monday, August 9, 2021, and is expected to be turned back on by Tuesday, August 10, 2021, at 1 pm.

Steam will be shut off beginning at 2 pm on Wednesday, August 11, 2021, and is expected to be turned back on by Thursday, August 12, 2021, at 4 pm.

A1MM, Bliss Hall, Bliss Annex, School of Business, Green hall, Kendall Hall, Trenton Hall, Roscoe Hall, Chemistry Addition, and Forcina Hall will have hot water during the shutdowns.

Armstrong hall, Physics, Chemistry, Biology, Music, Social Science, Brower Student Center, Centennial Hall, Gitenstein Library, STEM, Ely/Allen/Brewster, and Norsworthy Hall will not have hot water during the scheduled shutdowns.

Currently, there has been no hot water to Music, Social Science, and Brower Student Center since late June and will remain in effect when the steam is turned back on at the end of each scheduled shutdown. We anticipate repairs being completed and the hot water back in service for August 13, 2021.

Thank you for your understanding as we try to minimize the impact on our campus community.
